

Test Cases for DemoBlaze Website

Website: <https://www.demoblaze.com/> | Application: DemoBlaze – Online Shopping Website

1. Introduction

DemoBlaze is an online shopping website used for demonstrating and practicing software testing. The website provides different product categories such as Phones, Laptops, and Monitors. Users can browse products, view product details, create an account, log in, add products to the cart, and place orders.

The purpose of this document is to design test cases for verifying the functionality of the DemoBlaze website.

2. Test Case Format

The following test cases contain:

- Test Case ID
- Test Scenario
- Test Steps
- Expected Result

3. Home Page Test Cases

	Test Scenario	Test Steps	Expected Result
TC001	Verify website launch	Open the DemoBlaze URL	Home page should load successfully
TC002	Verify page title	Open the website and check the page title	Correct page title should be displayed
TC003	Verify navigation bar	Check Home, Contact, About Us, Cart, Log in and Sign up	All navigation options should be visible
TC004	Verify product categories	Check the categories section	Phones, Laptops and Monitors should be displayed
TC005	Verify products on home page	Open the home page	Products should be displayed correctly
TC006	Verify Home navigation	Click Home	User should be navigated to the home page
TC007	Verify carousel Next button	Click the Next button	Next carousel item should be displayed
TC008	Verify carousel Previous button	Click the Previous button	Previous carousel item should be displayed

4. Product Category Test Cases

	Test Scenario	Test Steps	Expected Result
TC009	Verify Phones category	Click Phones	Phone products should be displayed
TC010	Verify Laptops category	Click Laptops	Laptop products should be displayed
TC011	Verify Monitors category	Click Monitors	Monitor products should be displayed
TC012	Verify category switching	Select different categories	Products should change according to the selected category
TC013	Verify product selection	Click any product	Product details page should open

5. Product Details Test Cases

	Test Scenario	Test Steps	Expected Result
TC014	Verify product image	Open a product	Product image should be displayed
TC015	Verify product name	Open a product	Correct product name should be displayed
TC016	Verify product price	Open a product	Product price should be displayed
TC017	Verify product description	Open a product	Product description should be displayed
TC018	Verify Add to Cart button	Open a product	Add to Cart button should be visible
TC019	Add product to cart	Open a product and click Add to Cart	Product should be added to the cart
TC020	Add multiple products	Add two or more products	All selected products should appear in the cart

6. Sign Up Test Cases

	Test Scenario	Test Steps	Expected Result
TC021	Open Sign Up	Click Sign up	Sign Up window should open
TC022	Register with valid details	Enter a unique username and password and click Sign up	User should be registered successfully
TC023	Empty username	Leave username empty and enter password	Appropriate validation or error should be displayed
TC024	Empty password	Enter username and leave password empty	Appropriate validation or error should be displayed

TC025	Empty fields	Leave both fields empty and click Sign up	Appropriate validation or error should be displayed
TC026	Existing username	Enter an already registered username	Appropriate error message should be displayed
TC027	Close Sign Up	Open Sign Up and click Close	Sign Up window should close

7. Login Test Cases

	Test Scenario	Test Steps	Expected Result
TC028	Open Login	Click Log in	Login window should open
TC029	Login with valid credentials	Enter valid username and password and click Log in	User should be logged in successfully
TC030	Invalid username	Enter invalid username and valid password	Appropriate error message should be displayed
TC031	Invalid password	Enter valid username and invalid password	Appropriate error message should be displayed
TC032	Empty username	Leave username empty and enter password	Appropriate error should be displayed
TC033	Empty password	Enter username and leave password empty	Appropriate error should be displayed
TC034	Empty login fields	Leave both fields empty and click Log in	Appropriate validation or error should be displayed
TC035	Logout	Login successfully and click Log out	User should be logged out successfully

8. Shopping Cart Test Cases

	Test Scenario	Test Steps	Expected Result
TC036	Open Cart	Click Cart	Cart page should open
TC037	Verify added product	Add a product and open Cart	Added product should be displayed
TC038	Verify product price	Add a product and open Cart	Correct product price should be displayed
TC039	Verify total price	Add one or more products	Total price should be calculated correctly
TC040	Delete product	Add a product and click Delete	Selected product should be removed
TC041	Delete all products	Add multiple products and delete them	Cart should become empty
TC042	Verify empty cart	Open Cart without adding products	Cart should show no products
TC043	Add products from different categories	Add products from different categories	All selected products should appear in the cart

9. Place Order Test Cases

	Test Scenario	Test Steps	Expected Result
TC044	Open Place Order	Add product, open Cart and click Place Order	Place Order form should open
TC045	Place order with valid details	Enter valid details and click Purchase	Order should be placed successfully
TC046	Empty Name	Leave Name empty and click Purchase	Appropriate validation should be displayed
TC047	Empty Country	Leave Country empty and click Purchase	Appropriate validation should be displayed
TC048	Empty City	Leave City empty and click Purchase	Appropriate validation should be displayed
TC049	Empty Credit Card	Leave Credit Card empty and click Purchase	Appropriate validation should be displayed
TC050	Empty Month	Leave Month empty and click Purchase	Appropriate validation should be displayed
TC051	Empty Year	Leave Year empty and click Purchase	Appropriate validation should be displayed
TC052	Close order form	Open Place Order and click Close	Order form should close
TC053	Verify purchase confirmation	Complete the order and click Purchase	Purchase confirmation should be displayed

10. Contact Us Test Cases

	Test Scenario	Test Steps	Expected Result
TC054	Open Contact	Click Contact	Contact form should open
TC055	Send valid message	Enter valid email, name and message and click Send	Message should be submitted successfully
TC056	Invalid email	Enter an invalid email address	Appropriate validation should be displayed
TC057	Empty email	Leave email empty and click Send	Appropriate error should be displayed
TC058	Empty name	Leave name empty and click Send	Appropriate error should be displayed
TC059	Empty message	Leave message empty and click Send	Appropriate error should be displayed
TC060	Close Contact	Open Contact and click Close	Contact form should close

11. About Us Test Cases

	Test Scenario	Test Steps	Expected Result
TC061	Open About Us	Click About Us	About Us window should open
TC062	Verify About Us content	Check the displayed information	Correct information should be displayed
TC063	Close About Us	Click Close	About Us window should close

12. Negative Test Cases

	Test Scenario	Test Data	Expected Result
TC064	Login with invalid credentials	Wrong username and password	Login should not be successful
TC065	Register with existing username	Existing username	Registration should not be successful
TC066	Submit empty login form	Blank username and password	Appropriate error should be displayed
TC067	Submit empty order form	All fields blank	Order should not be completed
TC068	Enter invalid email	abc@	Invalid email should be rejected
TC069	Enter special characters	@#\$\$%^	Application should handle the input appropriately
TC070	Enter very long input	Very long username/name	Application should handle the input without crashing

13. Conclusion

The above test cases cover the major functionalities of the DemoBlaze website, including the Home Page, Product Categories, Product Details, Sign Up, Login, Shopping Cart, Place Order, Contact Us, and About Us modules.

Both positive and negative test scenarios are included to verify that the application works correctly under normal conditions as well as incorrect or unexpected inputs.

Proper execution of these test cases helps identify defects and ensures that the DemoBlaze application functions according to its expected requirements.
