

1. Print the numbers from 1 to 50 which are divisible by 5 using looping statement and display the output

Code:

```
package practice;
```

```
public class DivBy {
```

```
    public static void main(String[] args) {
```

```
        // TODO Auto-generated method stub
```

```
        int a=1;
```

```
        while(a<=50) {
```

```
            if(a%5==0) {
```

```
                System.out.println("values are:"+a);
```

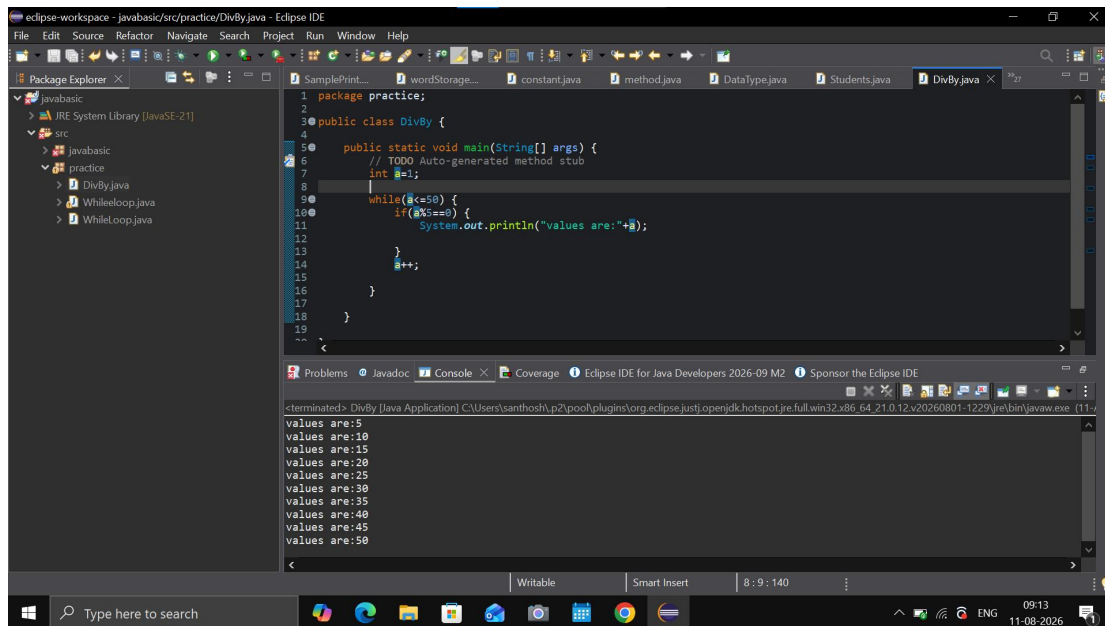

```
            }
```

```
            a++;
```

```
        }
```

```
    }
```

```
}
```

2. .Count the odd numbers between 1 to 100 and print
Code:

```
package practice;
```

```
public class OddNumbers {
```

```
public static void main(String[] args) {
```

```
// TODO Auto-generated method stub
```

```
int a=1;
```

```
while(a<=100) {
```

```
if(a%2!=0) {
```

```
System.out.println("Odd numbers:"+a);
```

```
}
```

```
a++;
```

```
}
```

```
}
```

}
